

April 2017, Jackson - Michigan: Anderton Machining will highlight for the first time, its capacities for the **Defense Industry** during the **Michigan Defense Exposition (MDEX), on April 26th -27th.**

With its centrally location, in Michigan – in the heart of the manufacturing industry - Anderton Machining benefits from the deep mechanical tradition in the Midwest.

With 80 Machining centers and 220,000 sq.ft. of manufacturing space, Anderton can manage all the needs of the Defense Industry for machine and assembly components.

Visit us at **Booth B10, on April 26-27th 2017.**
MDEX is located at the Macomb Community College,
14500 E Twelve Mile Rd, Warren, MI 48088

Engineering and Software

Engineering

- Industrial Size applications
- Precisions (+/- .003mm)
- Mid to Low Volume
- Tooling Designed/Manufacturing
- In-House
- Complete Supply Chain Management

Software

- CATIA
- Siemens NX
- SOLIDWORKS
- EZ CAM

Secondary Operations

- Induction Hardening
- Roll forming
- Assembly

Quality

- Metal lab
- Dimensional
- CMMs
- Gages
- Profilometer

Services: Gear Shaping and Splines, Swiss Turning and Grinding

www.andertonmachining.com

Anderton Machining, centrally located in Jackson, Michigan has 220,000 sq.ft. of manufacturing space comprising of vertical and horizontal machining centers. Anderton Machining’s strengths are its very knowledgeable and dedicated workforce, providing our customers with quality zero-defect products with on-time delivery. Offering; precision machining, Swiss turning and grinding, gear shaping and splines, Secondary operation, induction hardening.

Anderton Machining is your machining and assembly partner for Defense, Automotive, Heavy Truck, and On and Off-Highway vehicles.
